

ZOMATO RESTAURANT ANALYSIS - FINAL REPORT

Project For: InternSpark Data Science Internship

Author: AVANI MITRA

Date: June 2026

1. PROJECT OVERVIEW

This report analyzes Zomato restaurant data to understand:

- What factors affect restaurant ratings
- Which cuisines are most popular
- Best locations for restaurants
- Relationship between price and ratings

Dataset Source: Kaggle - Zomato Restaurant Data

Total Restaurants Analyzed: 125

2. KEY FINDINGS

FINDING 1: Average Ratings

Most restaurants have ratings between 3.5 and 4.5 out of 5.

Average rating: 3.8 / 5

FINDING 2: Most Popular Cuisines

The top 5 cuisines by number of restaurants are:

1. North Indian
2. Chinese
3. Fast Food
4. South Indian
5. Italian

FINDING 3: Best Locations

The locations with the most restaurants are:

1. Connaught Place
2. Rajouri Garden
3. Karol Bagh

FINDING 4: Price vs Rating

- Budget restaurants (under ₹500) have average rating: 3.5
- Medium range (₹500-1500) have average rating: 4.0
- Premium (₹1500+) have average rating: 3.9
- Best ratings come from ₹500-1500 price range

=====

3. VISUALIZATIONS CREATED

=====

1. Rating Distribution Histogram
 - Shows how restaurants are rated
 - Most restaurants have good ratings (3.5-4.5)
2. Top Cuisines Bar Chart
 - North Indian is the most popular cuisine
 - Chinese and Fast Food follow closely
3. Price vs Rating Scatter Plot
 - Shows relationship between cost and quality
 - No strong correlation found
4. Top Locations Horizontal Bar Chart
 - Connaught Place has highest restaurant density
 - Helps identify business opportunities

=====

4. RECOMMENDATIONS FOR ALFIDO TECH

=====

RECOMMENDATION 1: Partnership Strategy
Partner with North Indian restaurants as they are most popular among customers.

RECOMMENDATION 2: Location Focus
Focus marketing and promotions on Connaught Place area where most restaurants are located.

RECOMMENDATION 3: Pricing Strategy
Promote restaurants in ₹500-₹1500 price range as they receive the best ratings.

RECOMMENDATION 4: Feature Development
Add a "Top Rated Near Me" filter to help users find quality restaurants quickly.

RECOMMENDATION 5: Content Marketing
Create comparison guides for different cuisines to help users make informed choices.

5. TOOLS AND TECHNOLOGIES USED

Tool	Purpose
Python 3	Core programming language
Pandas	Data cleaning and manipulation
Matplotlib	Creating charts and graphs
Seaborn	Advanced visualizations
Google Colab	Cloud-based coding environment
GitHub	Project hosting and sharing

6. CONCLUSION

The Zomato data analysis revealed that:

1. Most restaurants maintain good ratings (3.5+ out of 5)
2. North Indian cuisine dominates the market
3. Connaught Place is the restaurant hub
4. Price does not strongly affect ratings

These insights can help Alfido Tech make data-driven decisions about restaurant partnerships, marketing strategies, and feature development.

7. DELIVERABLES SUBMITTED

- ✓ Jupyter Notebook with complete code and visualizations
- ✓ 4 data visualizations (charts)
- ✓ This report with key findings
- ✓ 5 actionable recommendations
- ✓ GitHub repository with all files
